1. Getting Started

Welcome to the CustomPictureFrames.com Order Management System. This comprehensive platform streamlines your entire order workflow from initial entry through payment collection and customer follow-up.

System Overview

The system includes:

- Automated pricing calculation based on materials and dimensions
- Multiple payment methods (Stripe, PayPal, Cash, Check)
- Integrated customer review request system (Email & SMS)
- Real-time order tracking and management
- ShipStation integration for order fulfillment
- Configurable pricing and business rules

Accessing the System

Navigate to your deployment URL in any modern web browser. The system works on desktop, tablet, and mobile devices.

Main Navigation

- New Order - Create new custom frame orders
- Orders - View and manage existing orders
- Control Panel - Adjust pricing and system settings (password protected)

2. Creating a New Order

Creating an order is a simple step-by-step process. All fields are optional, allowing flexibility for partial orders or quotes.

2.1 Customer Information

Required for all orders:

- Customer Name - Full name for order identification
- Email - For order confirmations and PayPal invoices
- Phone - For SMS notifications and contact
- Company - Optional business name
- PO Number - Optional purchase order reference

Ø=Ü; Tip: Email is required for PayPal invoices. Phone number is required for SMS review requests.

2.2 Frame Specifications

Order Type Selection:

- Full Frame - Complete custom frame with moulding (standard markup: 4.5×)
- Components Only - Individual parts without full frame (higher markup: 5.5×)
- Samples - Material samples for customer preview (\$0 item cost, shipping applies)

Frame Dimensions:

- Width & Height - Enter in inches (whole numbers or decimals)
- Moulding SKU - Select from dropdown or search by SKU number
- Quantity - Number of identical frames (default: 1)

Ø=Ü; Tip: The system automatically calculates United Inches (width + height) and applies corresponding pricing tiers.

2.3 Mat Configuration

The system supports up to 4 mat layers for complex framing projects.

Mat Fields (per layer):

- Mat SKU - Select from material dropdown
- Top Border - Opening size top margin
- Bottom Border - Opening size bottom margin
- Left Border - Opening size left margin
- Right Border - Opening size right margin

Fraction Support

Mat border fields accept fractions and decimals:

- "1/2" = 0.5 inches
- "16 1/2" or "16-1/2" = 16.5 inches
- "2.75" = 2.75 inches

Ø=Ü; Tip: Leave mat fields empty if no mat is needed. Each mat layer is completely optional.

2.4 Add-on Services & Options

Glazing & Protection:

- Acrylic Type - Select from dropdown (Clear, Non-Glare, UV, etc.)
- Backing - Foam core, corrugated, or other backing materials

Special Services:

- Drymount - Professional mounting service
- Float - Floating mount style
- Stretching - Canvas stretching service
- Foamboard Cutting - Custom cutting service

Shipping & Delivery:

- Delivery Method - Pickup, UPS Ground, Priority Mail, etc.
- Rush Processing - Expedited handling (\$50 fee)

Pricing Adjustments:

- Discount - Enter as dollar amount (\$10) or percentage (10%)
- Description/Notes - Internal notes and special instructions

⚠️ Tip: All pricing updates in real-time as you make selections. Review the pricing summary before submitting.

3. Payment Processing

The system supports four payment methods to accommodate different customer preferences and workflows.

3.1 Credit Card Payments (Stripe)

Process credit card payments securely through Stripe. The interface functions as a vendor terminal for processing different customer cards.

Payment Process:

1. Select "Credit Card" as the payment method
2. The payment amount defaults to the full order total
3. Adjust the amount for partial/deposit payments if needed
4. Enter the customer's card information:
 - Card number
 - Expiration date (MM/YY)
 - CVC security code
5. Click "Create Order" to process payment and save the order

Important Notes:

- The card form clears after each transaction (vendor terminal mode)
- Payment is processed immediately upon order creation
- Partial payments are allowed - remaining balance tracked automatically
- All transactions are secure and PCI-compliant through Stripe

& p Important: The payment amount must match the order total or be less for partial payments. The system prevents stale payment amounts.

3.2 PayPal Invoices

Send professional PayPal invoices directly to customers for remote payment. Perfect for customers who prefer to pay later or need formal invoicing.

How It Works:

1. Select "PayPal Invoice" as the payment method
2. Create the order (no immediate payment required)
3. Navigate to the order detail page
4. Click "Send PayPal Invoice" to email invoice to customer
5. Customer receives email with secure PayPal payment link
6. System automatically updates order balance when payment received

Automatic Payment Tracking:

- Webhook integration receives payment notifications from PayPal
- Order balance updates automatically when customer pays
- ShipStation sync deferred until payment confirmed (prevents shipping unpaid orders)
- Payment status visible in real-time on order detail page

📌 Tip: Customer email is required for PayPal invoices. Ensure email is entered before creating the order.

3.3 Cash & Check Payments

Record manual payments received in person or by mail.

Cash Payments:

1. Select "Cash" as the payment method
2. Enter the amount received (can be partial payment)
3. Create the order - balance tracked if partial payment
4. Order marked as paid if full amount received

Check Payments:

1. Select "Check" as the payment method
2. Enter check number and amount in payment fields
3. Create the order
4. Record additional check details in order notes if needed

Additional Payments:

For partial payments, you can collect additional payments later:

- Navigate to order detail page
- Click "Collect Payment" button
- Select payment method and amount
- Submit - balance automatically updated

4. Google Review Requests

Easily request customer reviews to build your online reputation. The system supports both email and SMS delivery for maximum convenience.

Sending Review Requests:

Two convenient locations to send requests:

From New Order Page:

- After creating an order, use the prominent "Request Google Review" button
- Enter customer name, email, and/or phone number
- Check SMS consent if customer agreed to receive text messages
- Click "Send Review Request"

From Order Detail Page:

- Navigate to any order's detail page
- Click "Request Google Review" button
- Customer information pre-filled from order
- Send via email, SMS, or both

Delivery Methods:

- Email (via Resend) - Professional branded email with direct review link
- SMS (via Twilio) - Quick text message with review link
- Both - Maximize response rate with dual delivery

Ø=Ü; Tip: SMS has higher open rates but requires customer consent. Email is always safe to send. For best results, send both.

5. Order Management

Track, search, and manage all orders from the centralized order list.

5.1 Viewing Orders

Navigate to "Orders" in the main menu to access the order list.

Search & Filter:

- Search by customer name, email, or order ID
- Filter by payment status (Paid, Unpaid, Partial)
- Sort by date, customer, or amount

Order Information Displayed:

- Order ID and creation date
- Customer name and contact info
- Order total and balance remaining
- Payment status badge
- Payment method used

5.2 Order Details

Click any order to view complete details and take actions.

Available Information:

- Complete customer information
- Frame specifications (dimensions, moulding, mats)
- Add-on services and special requests
- Itemized pricing breakdown
- Payment history and remaining balance
- Order notes and description

Available Actions:

- Collect Payment - Record additional payments
- Send PayPal Invoice - Email payment request to customer
- Request Google Review - Send review request
- Download PDF - Generate order summary PDF
- Edit Order - Modify order details (if needed)

Payment History:

View all payments made toward the order:

- Payment date and time
- Payment method
- Amount paid
- Transaction ID (for electronic payments)

5.3 Making Additional Payments

For orders with remaining balances, you can collect additional payments at any time.

Payment Collection Process:

1. Navigate to the order detail page
2. Click "Collect Payment" button
3. Payment dialog opens showing:
 - Current balance remaining
 - Payment method options
 - Amount input (defaults to full balance)
4. Select payment method:
 - Credit Card - Process card payment immediately
 - Cash - Record cash payment
 - Check - Record check payment with number
 - PayPal - Send invoice to customer
5. Enter payment amount (can be partial)
6. Submit payment

Automatic Balance Updates:

- Order balance recalculated immediately
- Payment history updated with new transaction
- Status changes to "Paid" when balance reaches \$0
- ShipStation syncs automatically for paid orders

Ø=Ü; Tip: You can collect multiple partial payments. The system tracks all transactions and maintains accurate balance information.

6. Control Panel (Admin)

The control panel allows authorized staff to configure pricing and business rules without code changes. Access is password-protected.

Accessing the Control Panel:

1. Navigate to "Control Panel" in the main menu
2. Enter the admin password when prompted
3. Access granted - configuration options available

Configurable Settings:

Markup Rates:

- Full Frame Markup - Default: 4.5× (450%)
- Components Markup - Default: 5.5× (550%)

Add-on Service Pricing:

- Drymount fee
- Float mounting fee
- Canvas stretching fee
- Foamboard cutting fee
- Rush processing fee

Shipping Rates:

- Tiered shipping by united inches
- Minimum shipping charge
- Pickup/local delivery handling

Sales Tax:

- Tax rate percentage
- Taxable/non-taxable item configuration

& p Important: Changes take effect immediately for new orders. Existing orders retain their original pricing.

7. Tips & Best Practices

Order Entry Efficiency

- Use the moulding search to quickly find SKUs
- Tab through fields for faster data entry
- Watch the real-time pricing update as you work
- Save partial orders as quotes by skipping payment

Payment Best Practices

- Always verify the payment amount before processing
- Use PayPal invoices for remote/phone orders
- Record check numbers in payment reference field
- Accept partial deposits to secure larger orders

Customer Communication

- Request reviews after successful order completion
- Send both email and SMS for maximum response
- Always get SMS consent before sending text messages
- Use order notes for special instructions to production

Order Management

- Check order list daily for pending payments
- Follow up on unpaid PayPal invoices after 48 hours
- Use search function to quickly locate customer orders
- Download PDF summaries for production/shipping

System Integration

- Paid orders automatically sync to ShipStation
- PayPal payments update automatically via webhooks
- Email confirmations sent automatically on order creation
- All payments are securely processed and logged

For technical support or questions, contact your system administrator.

Quick Reference Card

NEW ORDER CHECKLIST

- & Customer Name, Email, Phone
- & Frame Width & Height
